

## Disposing of ELECTRONICS

Getting rid of computers, T.V's, VCRs, cellphones, stereos, and other electronics is no easy task. **Why?** Toxins such as lead, mercury and arsenic are found in many of these items. Therefore, they cannot go in regular trash. Instead, use the chart below to decide what works best for you to get rid of your electronics.

<b>BEST BUY</b> <i>(located behind Harford Mall)</i>	<b>STAPLES</b> <i>(across from Harford Mall)</i>	<b>TARGET</b> <i>(Aberdeen off of Rt. 22)</i>	<b>HARFORD WASTE DISPOSAL CENTER</b> <i>(3241 Scarboro Rd., Street, MD 21154)</i>

## Disposing of Medical Sharps and Contaminated Materials

### Needles, Syringes, Lancets, & Other Sharps

Place in a hard-plastic or metal container with a screw-on or tightly secured lid.

Do not put sharp objects in any container that will be recycled or returned to a store.

Mark the container: **Sharps! Do Not Recycle**

A coffee can will do, but be sure to reinforce the plastic lid with heavy-duty tape.

Do not use glass or clear plastic containers.

Finally, make sure that you keep containers with sharp objects out of the reach of young children.

We also recommend that: **Soiled bandages, Disposable sheets, and Medical gloves** be placed in **securely fastened, heavy-duty plastic bags** before you put them in the garbage can with your other trash.

## Disposing of Motor Oil and Anti-Freeze

Containers are available 24/7 at the entrance to the City's Waste Water Treatment Plant. **Directions:** From Revolution St. to Seneca Ave., right on Wilson St., right on Jerry Foster Way.

## Disposing of Latex (water-based) Paint

Remove lid to allow wet paint to air dry OR add sand or kitty litter to absorb it. When dry, place can in regular trash. Make sure lid off. **Oil-based paint is a hazardous material and cannot go into the regular trash. Take cans to the Scarboro Landfill.**
